Brierley Hill, West Midlands

Personal Profile

I am a reliable and friendly individual who is well organised and responsible, with an adaptable personality to work within pressurised environments. I have a willingness to learn new skills while developing existing abilities. I can work independently and within a team and to also take a challenge being creatively minded and come up with the best solution possible and perform it.

I am an enthusiastic Junior Full Stack Developer with strong foundations in web development through academic studies and personal projects. I am skilled in both frontend and backend technologies, with hands-on experience building web applications using Python, JavaScript, React, PHP, and Laravel. Passionate about writing clean, efficient code and eager to learn in a collaborative environment.

I started using PHP in 2012, I have then progressed onto using Laravel which I have since used in commercial settings as well as personal use.

Education

Code Institute Level 5
Diploma in Web Application
Development - Distinction

Code Institute Level 3
Certificate in Software
Development - Pass

- Tools & Others: Git/GitHub, VS Code, NPM, Composer

Work History

Website Development, Hallveck Digital (Business owner) July 2026 – Current
Duties and responsibilities

- Create well-designed and testable code using languages like HTML, CSS, JavaScript and PHP.
- Fix bugs, update feature, monitor overall website speed, security and optimise SCO.
- Connect front-end interfaces with back-end databases and third-party services.
- Test applications across different browsers and mobile devices to ensure cross-platform compatibility.
- Work with clients to align technical output with visual and business goals.
- Full-Stack Developer: Handles both front-end and back-end tasks to build a complete web application from start to finish.

Delivery Driver, Evri and Uber Eats – Self Employed April 2026 – June 2026
Duties and responsibilities

- Collecting parcels from the local Delivery Unit and sort them into the correct delivery order for the round.
- Delivering various parcel sizes to residential households and businesses.
- Using the Evri Courier Community App to scan every parcel at pickup and drop-off to ensure tracking.
- Obtaining proof of delivery via photo or signature. If a customer is not home, I find a safe, secure place for the parcel and inform the customer to where it is.
- Visiting local shops or residents to collect parcels for return or dispatch.
- Using my own car and ensure it has the appropriate MOT and insurance.

Electrical Engineer, Acado September 2022 – December 2022
Duties and responsibilities

- To ensure all the equipment was working and safe
- To maintain the cleanliness of the site after ensuring the isolator switch is locked off, whilst ensuring this was done safely and in a timely manner.
- Communicating with the team over internal devices

PHP Developer, Scolmore International August 2021 – November 2021
Duties and responsibilities

- Meeting clients to work out what they need
- Creating plans and prototypes with the design team to decide how the website or application will fit together
- Writing code in different programming languages
- Building databases and transferring information between databases using Applications Program Interfaces (APIs); using software to create the layout of buttons, links and pictures.
